Paper Title

Early Warning System for Systemic Financial Risk in Indian Financial Markets Using Artificial Neural Networks

REVIEW QUESTIONS

1. REVIEW REPORT International Conference on Emerging Engineering Technologies and Applications (IC-EETA'25) Paper ID: Title of the Manuscript:
Early Warning System for Systemic Financial Risk in Indian Financial Markets Using Artificial Neural Networks

2. Please tick the appropriate on the basis of criteria provided. Theoretical / Conceptual Framework
Excellent

3. Significance of Research
Excellent

4. Literature Review and Methodology
Excellent

5. Quality of Data or Findings
Excellent

6. Readability and Writing Style
Good

7. Results and Discussion
Excellent

8. Overall rating
Excellent

9. Recommendation

10. Reviewers Comments:

This paper has tried to present a workable early warning system of systemic financial risk in India with the help of Artificial Neural Network (ANN). The authors emphasize the fact that the

typical statistics is not sufficient with the nonlinear behavior of the financial markets. The process is quite strong, where data is sourced and collected on such sources as RBI and IMF ,

and it is mass preprocessed and a feat engineered also called Contagion Score. The ANN model, which has three hidden layers and the dropout rate of 0.3, is clear and compares
